S 4 1/2 - 1st half input; 2nd half output/response/reporting

calibrates
correlating
"supervising"

S 4 1/2 input keeps object in strict "envelope" - in a
sense confining/restricting. At point impetus ceases,
flow reverses, + becomes ^{output} responding/status reporting, though
some input occurs periodically as "adjusting."

S 4 1/2 in/output seems to be in the broadest sense of idea

S 4 1/2 during 2nd half, periodic input affects attitude, perhaps course
or orientation

54 1/2 as if activity is occurring even though instigators said it wasn't; as it s. thing mutually agreed on; but people involved w/ project felt a necessity to conduct it despite agreement. Idea of ends justify means.

Site involves event composed of 5 stages; planning; preparatory; conduct; evaluation; during course of conduct of project, moving ^{object} receives input which is informational in nature & directs, controls, variates status; & has ← something w/ parameters + "supervising" + strict "performance envelope." After 1st part, when impetus for object no longer present, information flow reverses; output involves response/reporting. Periodic input during 2nd part affects attitude, perhaps course or orientation. ← Entire project has sense of "quasi-legality"; as if people at site felt activity would be frowned on by 3rd party, it legitimizes it; that it would evoke a feeling of betrayal or unfairness; as if activity is occurring even though instigators said it wouldn't upon mutual agreement. But people involved felt necessity to conduct it nevertheless; "ends justify means."
